# ANAPHYLAXIS AND ALLERGIC REACTIONS

**QUALITY AREA 2 | VERSION 1.0** 

This policy was reviewed by Australasian Society of Clinical Immunology and Allergy, Allergy & Anaphylaxis Australia Inc. For more information visit

https://www.nationalallergystrategy.org.au/

#### **PURPOSE**

This policy provides guidelines Gembrook Preschool to:

- minimise the risk of an allergic reaction including anaphylaxis occurring while children are in the care of Gembrook Preschool
- ensure that service staff respond appropriately to allergic reactions including anaphylaxis by following the child's ASCIA Action Plan for Anaphylaxis and ASCIA Action Plan for Allergic Reactions
- raise awareness of allergies and anaphylaxis and appropriate management amongst all at the service through education and policy implementation.
- working with parents/guardians of children with either an ASCIA Action Plan for Anaphylaxis or ASCIA Action Plan for Allergic Reactions in understanding risks and identifying and implementing appropriate risk minimisation strategies and communication plan to support the child and help keep them safe.

This policy should be read in conjunction with the *Dealing with Medical Conditions Policy and Incident, Injury, Trauma and Illness Policy*.

#### **POLICY STATEMENT**

#### **VALUES**

Gembrook Preschool believes that the safety and wellbeing of children who have allergic reactions and/or are at risk of anaphylaxis is a whole-of-community responsibility, and is committed to:

- ensuring that every reasonable precaution is taken to protect children from harm and from any hazard likely to cause injury
- providing a safe and healthy environment in which children at risk of anaphylaxis can participate fully in all aspects of the program
- raising awareness amongst families, staff, children and others attending the service about allergies and anaphylaxis
- actively involving the parents/guardians of each child at risk of anaphylaxis in assessing risks, and in developing appropriate risk minimisation and risk management strategies for their child
- ensuring all staff members and other adults at the service have adequate knowledge of allergies, anaphylaxis and emergency procedures
- facilitating communication to ensure the safety and wellbeing of children at risk of anaphylaxis.

#### **SCOPE**

This policy applies to the approved provider, persons with management or control, nominated supervisor, persons in day-to-day charge, early childhood teachers [ECT], educators, staff, students, volunteers, parents/guardians, children, and others attending the programs and activities of Gembrook Preschool, including during offsite excursions and activities.

**Anaphylaxis and Allergic Reactions** 

Gembrook Preschool Association Inc Registration No: A0010029N ABN: 36 754 804 648

This policy will apply regardless of whether a child diagnosed by a registered medical practitioner as being at risk of anaphylaxis is enrolled at the service.

RESPONSIBILITIES	Approved provider and persons with management or control	Nominated supervisor and persons in day-to-day charge	Early childhood teacher, educators and all other staff	Parents/guardians	Contractors, volunteers and students
R indicates legislation requirement, and sho	ould not	be delete	d		
Ensuring that an anaphylaxis policy, which meets legislative requirements (Regulation 90) and includes a medical management plan (refer to Definitions), risk minimisation plan (refer to Definitions) (refer to Attachment 3) and communication plan (refer to Definitions), is developed and displayed at the service, and all plans are reviewed annually	R	V			
Providing approved anaphylaxis management training (refer to Sources) to staff as required under the National Regulations	R	<b>V</b>			
Ensuring that at least one ECT/educator with current (within the previous 3 years) approved anaphylaxis management training (refer to Definitions) is in attendance and immediately available at all times the service is in operation (Regulations 136, 137)	R	V			
Ensuring that all ECT/educators approved first aid qualifications, anaphylaxis management training (refer to Sources) and emergency asthma management training are current (within the previous 3 years), meet the requirements of the National Act (Section 169(4)) and National Regulations (Regulation 137), and are approved by ACECQA (refer to Sources)	R	V			
Providing opportunities for ECT/Educators to undertake food allergen management training (refer to Sources)	√	√			
Develop an anaphylaxis emergency response plan which follows the ASCIA Action Plan (refer to Attachment 4) and identifies staff roles and responsibilities in an anaphylaxis emergency. Emergency response plans should be practised at least once a year. Separate emergency response plans must be developed for any off-site activities	٧	٧	٧		<b>V</b>
Ensuring ECT/educators and staff are aware of the procedures for first aid treatment for anaphylaxis (refer to Attachment 4)	R	√	√		
Ensuring all staff, parents/guardians, contractors, volunteers and students are provided with and have read the <i>Anaphylaxis and Allergic Reactions Policy and the Dealing with Medical Conditions Policy (Regulation 91)</i>	R	V			

Ensuring that staff undertake ASCIA anaphylaxis refresher etraining as required (refer to Sources) and participate in regular practice of adrenaline injector administration, with participation documented in the staff record	٧	V			
Ensuring the details of approved anaphylaxis management training (refer to Definitions) are included on the staff record (refer to Definitions), including details of training in the use of an adrenaline injectors (refer to Definitions) (Regulations 145,146, 147)	R	V	<b>V</b>		
Ensuring that parents/guardians or a person authorised in the enrolment record provide written consent to the medical treatment or ambulance transportation of a child in the event of an emergency (Regulation 161), and that this authorisation is kept in the enrolment record for each child	R	V		<b>V</b>	
Ensuring that parents/guardians or a person authorised in the child's enrolment record provide written authorisation for excursions outside the service premises (Regulation 102) (refer to Excursions and Service Events Policy)	R	V	<b>V</b>	V	
Identifying children at risk of anaphylaxis during the enrolment process and informing staff	√	√	<b>V</b>		
In the case of a child having their first anaphylactic reaction whilst at the service, the general use adrenaline injector should be given to the child immediately, and an ambulance called. If the general use adrenaline injector is not available, staff will follow the ASCIA First Aid Plan (refer to Attachment 4) including calling an ambulance	<b>V</b>	<b>V</b>	<b>V</b>		<b>V</b>
Following appropriate reporting procedures outlined in the Incident, Injury, Trauma and Illness Policy in the event that a child is ill or is involved in a medical emergency or an incident at the service that results in injury or trauma (Regulation 87)	R	V	<b>√</b>		<b>V</b>
In addition to the above, services where a child diagnosed as responsible for:	at risk of	anaphyl	axis is en	rolled, al	SO
Displaying a notice prominently at the service stating that a child who has been diagnosed as at risk of anaphylaxis is being cared for and/or educated by the service (Regulation 173(2)(f))	R	V			
Ensuring the enrolment checklist for children diagnosed as at risk of anaphylaxis (refer to Attachment 2) is completed	R	√			
Ensuring that before the child begins orientation and attending the service, the parents have provided a medical management plan (refer to Definitions), a risk minimisation and communication plan has been developed, and authorisation for any medication and medical treatment has been obtained	R	V		<b>√</b>	
Ensuring an ASCIA Action Plan for Anaphylaxis / ASCIA Action Plan for Allergic Reactions, completed by the child's doctor or nurse practitioner and provided by the parents, is included in the child's individual anaphylaxis health care plan	R	V	<b>V</b>		
Ensuring medical management plan (refer to Definitions), risk minimisation plan (refer to Definitions) (refer to Attachment 3) and communications plan (refer to Definitions) are developed for each child at the service who has been medically diagnosed as at	R	V	<b>V</b>		

risk of anaphylaxis, in consultation with the child's parents/guardians and a registered medical practitioner (refer to Attachment 3) and that these plans are reviewed annually					
Ensuring individualised anaphylaxis care plans are reviewed when a child's allergies change, after exposure to a known allergen while attending the service, or before any special activities (such as off-site activities), to ensure that information is up to date and correct and that any new procedures for the special activity are included	V	٧	<b>√</b>		٨
Ensuring that all children diagnosed as at risk of anaphylaxis have details of their allergy recorded in their enrolment record (Regulation 162) and that their ASCIA Action Plan for Anaphylaxis or ASCIA Action Plan for Allergic Reactions, along with their risk minimisation plan, are easily accessible to all staff	R	V	<b>V</b>		
Ensuring an individualised anaphylaxis care plan is developed in consultation with the parents/guardians for each child diagnosed as at risk of anaphylaxis (refer to Attachment 5)	V	<b>V</b>	<b>V</b>		
Compiling a list of children at risk of anaphylaxis and placing it in a secure but readily accessible location known to all staff. This should include the ASCIA Action and ASCIA Action Plan for Allergic Reactions Plan for anaphylaxis for each child	V	V	V		
Ensuring that all staff, including casual and relief staff, are aware of children diagnosed as at risk of anaphylaxis, their signs and symptoms, and the location of their adrenaline injector and ASCIA Action Plan for Anaphylaxis or ASCIA Action Plan for Allergic Reactions	R	V	V		<b>V</b>
Ensuring that parents/guardians of children diagnosed as at risk of anaphylaxis provide an unused, in-date adrenaline injector (if prescribed) to be kept on-site while their child is attending the service. If the adrenaline injector is not provided, the child will be unable to attend the service	V	<b>V</b>	<b>√</b>	<b>V</b>	<b>V</b>
Ensuring that the child's ASCIA Action Plan for anaphylaxis is specific to the brand of adrenaline injector prescribed by the child's medical or nurse practitioner	V	√	<b>V</b>		
Following the child's ASCIA Action Plan for Anaphylaxis or ASCIA Action Plan for Allergic Reactions in the event of an allergic reaction, which may progress to anaphylaxis		√	<b>V</b>		<b>V</b>
Following the ASCIA Action Plan / ASCIA First Aid Plan in accordance with current national recommendations (refer to Attachment 4) and ensuring all staff are aware of the procedure	R	<b>V</b>	<b>V</b>		<b>V</b>
Ensuring that the adrenaline injector is stored in a location that is known to all staff, including casual and relief staff, is easily accessible to adults both indoors and outdoors (not locked away) but inaccessible to children, kept at room temperature, and not refrigerated or exposed to heat or sunlight.	R	V	<b>V</b>		<b>V</b>
Ensuring adequate provision and maintenance of adrenaline injector kits (refer to Definitions)	R	√	√	√	<b>√</b>
Ensuring that the expiry dates of both prescribed and general use adrenaline injectors are checked regularly (quarterly) and replaced when required	R	√	<b>V</b>		<b>V</b>

R	V

Providing information to the service community about resources and support for managing allergies and anaphylaxis	V	√		
Providing support (including counselling) for ECT/educators and staff who manage an anaphylaxis incident, as well as for the child affected and any witnesses.	<b>√</b>	<b>V</b>	<b>√</b>	<b>V</b>

#### RISK ASSESSMENT

While the **National Law and National Regulations** do not require services to maintain a supply of generaluse adrenaline autoinjectors, the Gembrook Preschool **Committee of Management and Approved Provider** have determined that two adrenaline autoinjectors will be always kept on-site.

Key factors considered in this decision include:

- Proximity to the nearest medical facility.
- Estimated ambulance response times.
- The need for immediate access to life-saving medication in the event of an anaphylactic emergency.

To ensure the effective management of anaphylaxis, the Approved Provider must:

- Maintain an adequate supply of adrenaline autoinjectors, ensuring all devices are in-date and unused.
- Establish clear procedures outlining when and how the devices will be used.
- Ensure administration follows the ASCIA Action Plan for Anaphylaxis and the manufacturer's instructions.
- Adhere to the Administration of Medication Policy when administering medication in an emergency.
- Inform parents/guardians that the service stocks general-use adrenaline autoinjectors, including details of the brand and emergency procedures.

By implementing these measures, the service ensures it is well-prepared to respond effectively to an anaphylaxis emergency.

# BACKGROUND AND LEGISLATION

#### **BACKGROUND**

Anaphylaxis is a severe and life-threatening allergic reaction. Allergies, particularly food allergies are common in children. The most common causes of allergic reaction in young children are foods, bee or other insect stings, and some medications. A reaction can develop within minutes of exposure to the allergen and young children may not be able to identify or communicate the symptoms of anaphylaxis. With planning and training, many reactions can be prevented, however when a reaction occurs, good planning, training and communication can ensure the reaction is treated effectively by using an adrenaline injector.

In any service that is open to the general community, it is not possible to achieve a completely allergen-free environment. A range of procedures and risk minimisation strategies, including strategies to minimise exposure to known allergens, can reduce the risk of allergic reactions including anaphylaxis.

Legislation that governs the operation of approved children's services is based on the health, safety and welfare of children, and requires that children are protected from hazards and harm. The approved provider will ensure that there is at least one educator on duty at all times who has current approved anaphylaxis management training in accordance with the *Education and Care Services National Regulations 2011* (*Regulation 136(1) (b)*). As a demonstration of duty of care and best practice, the service encourages all educators to maintain current, approved anaphylaxis management training (refer to Definitions).

Approved anaphylaxis management training is listed on the ACECQA website (*refer to Sources*). This includes ASCIA anaphylaxis e-training for Australasian children's education and care services, which is an accessible, evidence-based, best practice course that is available free of charge. The ASCIA course is National Quality Framework (NQF) approved by ACECQA for educators working in ECEC services.

#### LEGISLATION AND STANDARDS

Relevant legislation and standards include but are not limited to:

- Education and Care Services National Law Act 2010: Sections 167, 169
- Education and Care Services National Regulations 2011: Regulations 90–96, 102, 136, 137, 146, 147, 160–162, 168(2)(d), 173, 177, 181, 183, 184.
- Health Records Act 2001 (Vic)
- National Quality Standard, Quality Area 2: Children's Health and Safety
- Occupational Health and Safety Act 2004 (Vic)
- Occupational Health and Safety Regulations 2017
- Privacy and Data Protection Act 2014 (Vic)
- Privacy Act 1988 (Cth)
- Public Health and Wellbeing Act 2008 (Vic)
- Public Health and Wellbeing Regulations 2009 (Vic)

#### The most current amendments to listed legislation can be found at:

- Victorian Legislation Victorian Law Today: <a href="www.legislation.vic.gov.au">www.legislation.vic.gov.au</a>
- Commonwealth Legislation Federal Register of Legislation: <u>www.legislation.gov.au</u>

#### **DEFINITIONS**

The terms defined in this section relate specifically to this policy. For regularly used terms e.g. Approved provider, Nominated supervisor, Notifiable complaints, Serious incidents, Duty of care, etc. refer to the Definitions file.

Adrenaline injector: An intramuscular injection device containing a single dose of adrenaline designed to be administered by people who are not medically trained. In Australia, the only available brand of adrenaline injector is EpiPen®, as Anapen® Junior 150 and Anapen® 300 have been discontinued. Anapen® 500 remains available only for individuals weighing 50kg and over. Since different adrenaline injectors have unique administration techniques, individuals must use the device specified in their ASCIA Action Plan for Anaphylaxis (*refer to Definitions*). Staff should be trained in administering EpiPen® and be aware of the correct procedure for Anapen® 500 if applicable.

Used adrenaline injectors should be placed in a hard plastic container or similar and given to the paramedics. Or placed in a rigid sharps disposal unit or another rigid container if a sharps container is not available.

Adrenaline injector kit: An insulated container with an unused, in-date adrenaline injector, a copy of the child's ASCIA Action Plan for Anaphylaxis, and telephone contact details for the child's parents/guardians, doctor/medical personnel and the person to be notified in the event of a reaction if the parents/guardians cannot be contacted. If prescribed, an antihistamine should also be included in the kit. Adrenaline injectors must be stored away from direct heat and cold.

**Allergen:** A substance that can cause an allergic reaction.

**Allergy**: An immune system response to something in the environment, which is usually harmless, e.g.: food, pollen, dust mite. These can be ingested, inhaled, injected or absorbed. Almost always, food needs to be ingested to cause a severe allergic reaction (anaphylaxis) however, measures should be in place for children to avoid touching food they are allergic to.

**Allergic reaction:** A reaction to an allergen. Common signs and symptoms include one or more of the following:

- Mild to moderate signs & symptoms:
  - o hives or welts
  - tingling mouth
  - o swelling of the face, lips & eyes
  - abdominal pain, vomiting and/or diarrhoea are mild to moderate symptoms; however, these are severe reactions to insects.
- Signs & symptoms of anaphylaxis are:
  - difficult/noisy breathing
  - swelling of the tongue
  - o swelling/tightness in the throat
  - difficulty talking and/or hoarse voice
  - o wheeze or persistent cough
  - o persistent dizziness or collapse (child pale or floppy).

**Anapen®:** A type of adrenaline injector (*refer to Definitions*) that delivers a single fixed dose of adrenaline. Its administration technique differs from that of the EpiPen®. Due to supply changes, Anapen® Junior 150 and Anapen® 300 are no longer available in Australia. The only remaining strength is Anapen® 500, which may be prescribed for individuals weighing 50kg or more. A child's ASCIA Action Plan for Anaphylaxis (*refer to Definitions*) must be specific to the brand they have been prescribed. As Anapen® Junior 150 and Anapen® 300 are no longer available, most children will now be prescribed EpiPen®.

**Anaphylaxis:** A severe, rapid and potentially life-threatening allergic reaction that affects normal functioning of the major body systems, particularly the respiratory (breathing) and/or circulation systems.

**Anaphylaxis management training:** Training that includes recognition of allergic reactions, strategies for risk minimisation and risk management, procedures for emergency treatment and practical instruction on administering an adrenaline autoinjector (refer to Definitions) trainer. Approved training is listed on the ACECQA website (refer to Sources).

ASCIA Action Plan for Anaphylaxis/Allergic Reactions: A standardised emergency response management plan for anaphylaxis, prepared and signed by the child's treating registered medical or nurse practitioner, that includes the child's name and confirmed allergies, a photograph of the child, a description of the prescribed anaphylaxis medication and clear instructions on treating an anaphylactic episode. The plan must be specific for the brand of adrenaline injector prescribed for each child. Examples of plans specific to different adrenaline injector brands are available for download on the Australasian Society of Clinical Immunology and Allergy (ASCIA) website: <a href="https://www.allergy.org.au/hp/anaphylaxis/ascia-action-plan-for-anaphylaxis">https://www.allergy.org.au/hp/anaphylaxis/ascia-action-plan-for-anaphylaxis</a>

At risk child: A child whose allergies have been medically diagnosed and who is at risk of anaphylaxis.

**EpiPen®:** A type of adrenaline injector (*refer to Definitions*) containing a single fixed dose of adrenaline which is delivered via a spring-activated needle that is concealed until administration is required. Two strengths are available: an Epipen® and an Epipen Jr®, and each is prescribed according to a child's weight. The Epipen Jr® is recommended for a child weighing 10–20kg. An Epipen® is recommended for use when a child weighs more than 20kg. The child's ASCIA Action Plan for anaphylaxis (*refer to Definitions*) must be specific for the brand they have been prescribed.

**First aid management of anaphylaxis course**: Accredited training in first aid management of anaphylaxis including competency in the use of an adrenaline autoinjector.

**Intolerance:** Often confused with allergy, intolerance is an adverse reaction to ingested foods or chemicals experienced by the body but not involving the immune system.

**No food sharing:** A rule/practice in which a child at risk of anaphylaxis only eats food that is supplied/permitted by their parents/guardians and does not share food with, or accept food from, any other person.

**Nominated staff member:** (In relation to this policy) a staff member nominated to be the liaison between parents/guardians of a child at risk of anaphylaxis and the approved provider. This person also checks

regularly to ensure that the adrenaline injector kit *(refer to Definition)* is complete, and that the device itself is unused and in date and leads practice sessions for staff who have undertaken anaphylaxis management training.

#### **EVALUATION**

In order to assess whether the values and purposes of the policy have been achieved, the approved provider will:

- selectively audit enrolment checklists (for example, annually) to ensure that documentation is current and complete
- regularly seek feedback from everyone affected by the policy regarding its effectiveness
- monitor the implementation, compliance, complaints and incidents in relation to this policy
- keep the policy up to date with current legislation, research, policy and best practice
- revise the policy and procedures as part of the service's policy review cycle or following an anaphylactic episode at the service, or as otherwise required
- notifying all stakeholders affected by this policy at least 14 days before making any significant changes to this policy or its procedures, unless a lesser period is necessary due to risk (Regulation 172 (2)).
